

Leasys Portugal and Banco Credibom strengthen synergies within the Crédit Agricole Group with the delivery of 120 vehicles in 2026

- Leasys Portugal will deliver 120 vehicles to Banco Credibom, in a partnership that reflects the natural synergies between companies within the Crédit Agricole Group
- The renewal of Banco Credibom's fleet will take place throughout 2026, with around 100 vehicles representing the Stellantis Group

Leasys, a joint venture between Stellantis and Crédit Agricole Personal Finance & Mobility – specialized in mobility solutions ranging from medium and long-term rental to corporate fleet management – and Banco Credibom, a subsidiary of Crédit Agricole Personal Finance & Mobility that offers a diverse range of financial solutions, have announced a new strategic partnership in Portugal for the comprehensive management of Credibom's vehicle fleet.

Banco Credibom's fleet renewal will take place throughout 2026 and will consist of 116 electrified vehicles — 97 hybrid electric vehicles (HEVs), 17 plug-in hybrid electric vehicles (PHEVs) and 2 fully electric.

Following a thorough negotiation process, this contract award represents a significant milestone for both organisations. For Leasys, it reinforces its position as a leading strategic partner in the management of large corporate fleets. For Banco Credibom, this decision reinforces its commitment to the sustainability policies it has been implementing and for which it has been recognised, notably through its B Corp certification. Banco Credibom became the first consumer credit institution in Portugal to obtain this certification, joining a global movement of companies that use their business activities as a driver of positive impact on society and the environment.

Under this partnership, Leasys will also be responsible for the comprehensive management of all services associated with vehicle hire, including maintenance, tyres, replacement vehicles and insurance. This approach allows mobility management to be centralised with a single provider, promoting greater operational efficiency and helping to optimise the overall costs of Banco Credibom's fleet.

According to **Fernando Sousa, Sales Director of Leasys Portugal**: *“This partnership with Banco Credibom represents another important step in establishing Leasys as the strategic partner for corporate mobility management. We have been able to offer competitive solutions that are fully aligned with the Bank’s demanding requirements, which naturally fills us with pride. The trust placed in our expertise, ensuring comprehensive fleet management, reinforces our commitment to offering the best solutions to different market sectors and fostering synergies within companies within the same Group.”*

“Our decision to choose Leasys for the management of our fleet reflects our commitment to solutions that drive efficiency and sustainable growth. This partnership allows us to benefit from clear synergies within the Crédit Agricole Group, whilst also aligning with the commitment we have made as a B Corp-certified company, integrating ESG criteria into our decisions and contributing to a more positive environmental impact,” says **Isabel Guimarães, Head of Sustainability at Banco Credibom**.
