

## Leasys launches the renewed Clickar\* platform across Europe

- Leasys presents its enhanced used vehicle sales platform, enabling faster access to a wide selection of vehicles and a streamlined purchasing process.
- A fully redesigned digital environment improves usability, with enhanced navigation and more effective search capabilities.
- Clickar enables professional traders to buy used and off-lease vehicles through dedicated online auctions, with a progressive extension of the service to private customers.

**Rome, April 27th, 2026** – Leasys announces the launch of the renewed Clickar platform, its digital marketplace for used vehicles, further strengthening its remarketing business and digital capabilities in Europe.

Fully redesigned, the platform offers improved performance, scalability and ease of use. The new interface simplifies navigation, enhances search functions and allows users to quickly access and evaluate available vehicles.

Initially dedicated to professional traders, Clickar provides a structured environment where partners and professional buyers can access a wide selection of vehicles sourced from Leasys' long-term rental activity, ensuring a reliable and regularly renewed stock, and buy vehicles through online auction processes, ensuring a simple and transparent purchasing experience. As part of its development roadmap, the platform will be progressively extended to private customers, broadening its reach and supporting the evolution of Leasys' remarketing strategy.

*"Clickar is a strategic lever to further develop our remarketing business, supporting both operational efficiency and commercial growth across Europe,"* said Matteo Merlo, Remarketing Chief Officer at Leasys. *"Through a more intuitive, efficient and transparent platform, we are elevating the customer experience, ensuring simpler and faster access to our vehicle offering."*

With Clickar, Leasys continues to expand its digital ecosystem, enhancing operational efficiency and accelerating the evolution of its remarketing business across Europe.

*\* Clickar is available in all Leasys operating markets, excluding the UK and Netherlands. In Spain, the platform operates under the name Leasys Automarket, while maintaining the same functionalities and service offering.*
